Indoor Skydiving

Ever wondered what it would feel like to fly? Not sure if you can face jumping out of a perfectly good airplane? Well now you can get to experience the thrill and exhilaration of free fall in a safe environment without the need of a parachute!

Why not try out the new sport of body flying in one of Britain's Indoor Vertical Wind Tunnels. The tunnel consists of a series of very power fans which create a column of air that is strong enough to support your weight thus giving you the sensation of floating. It is totally safe and includes a wire mesh which stops you from getting anywhere near to the fans.

After just a 30 minute briefing you will be able to experience the dream of flight and get to try out some aerial manoeuvres! And what's more, your family and friends will be able to share your experience with you from the viewing gallery.

Tunnel flying is like the real thing, so much so that all serious competitive skydivers use the tunnel to refine their techniques and to stay sharp. The introduction of wind tunnels into this country have helped to strengthen Britain's ranking at World level culminating with the British Women's 4-way Skydiving Team winning the World Championships in 2006 and 2008.
